INTRODUCTION

These exercises are meant to keep you practicing thing we learn and what we are about to learn in the course. If you don't know how to solve any of the exercise, please first see the solution and try to figure it out, and if you still don't know how to solve them, please contact me.

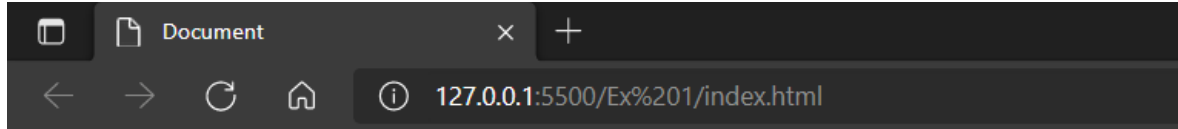

The main goal of these exercises is for you to get familiar with HTML and CSS. So, as I said earlier if you get stuck on one, please first see the solution, or continue to the next one.

Best way to learn is to practice coding

Homework

EXERCISE 01

Create some links to various search engines (google, yahoo, altavista, lycos, etc).

[Search the web with Google!](#)

[Search the web with Yahoo!](#)

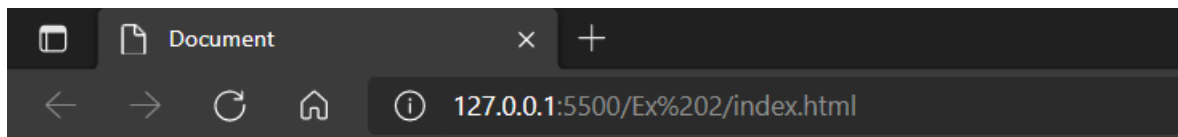

[Search the web with Bing!](#)

[Search the web with Altavista!](#)

[Search the web with Lycos!](#)

EXERCISE 02

Create links to five different pages on five different websites that should all open in a new window.

[Landofcode.com about page](#)

[HostForWeb Web Hosting](#)

[GMX email](#)

[Find out local weather](#)

[Learn about algebra](#)

EXERCISE 03

Homework

Create a page with a link at the top of it that when clicked will jump all the way to the bottom of the page.

[Click here to jump to the bottom of the page](#)

EXERCISE 06

Homework

Display five different images. Skip two lines between each image. Each image should have a title.

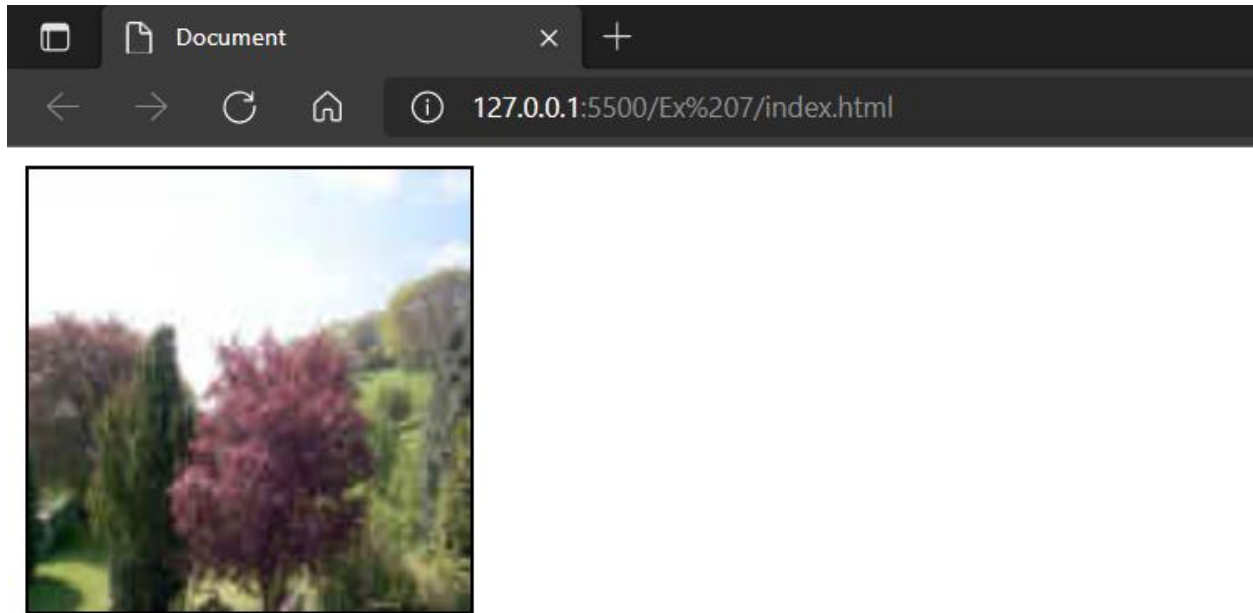

You can find this images in the resource folder homework1_ressources

EXERCISE 07

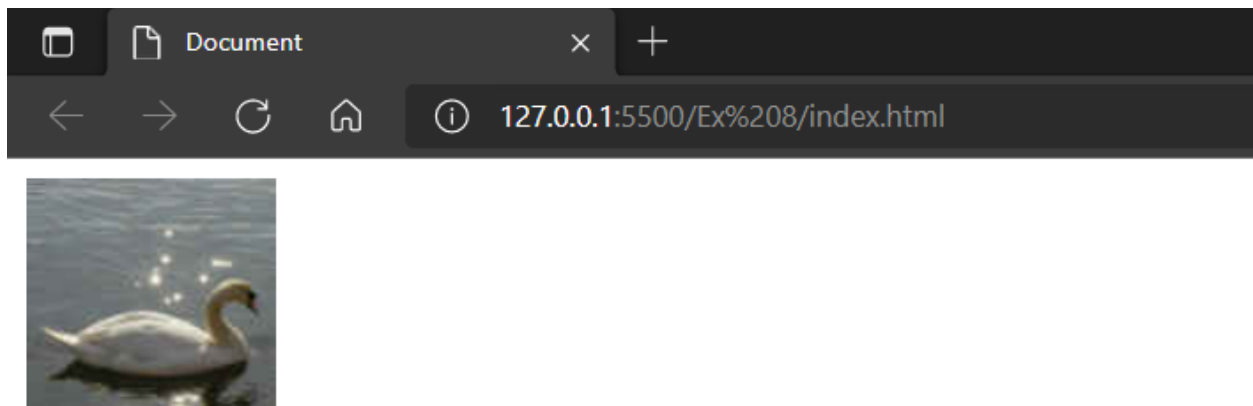

Display an image that has a border of size 2, a width of 200, and a height of 200.

Homework

EXERCISE 08

Display an image that when clicked will link to a search engine of your choice (should be opened in a new window).

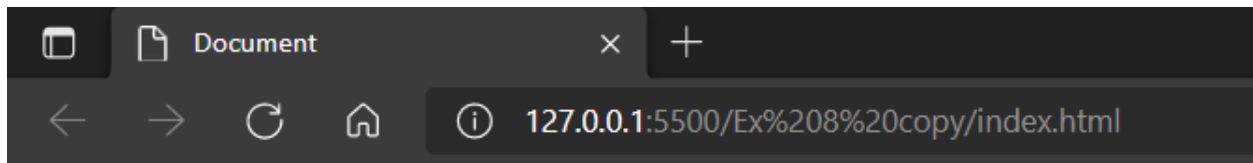

Click on the image to be taken to the Yahoo search engine.

EXERCISE 09

Display an image that when clicked will link to itself and will display the image in the browser by itself.

Homework

Click on the image to see it in the browser by itself.
